About Me

Backend-focused Developer passionate about building web and AI-powered applications. Experienced in API development, databases, and modern backend technologies, with exposure to LLMs, RAG, LangChain, Vector DB, Docker, and CI/CD workflows. Comfortable working across different parts of a project and always eager to learn and improve.

Education

BKNMU University
Bachelor of Computer application

July 2023 – Mar 2026
CGPA: 8.02 / 10

Projects

Quick-AI | *React.js, Node.js, Express.js, PostgreSQL, Neon DB, Clerk, Gemini API* Jan 2026

- Built an AI-powered content creation platform for generating articles, summaries, resumes, and images.
- Integrated Gemini API and Clerk authentication to automate content generation workflows.
- Implemented features like image/background removal and document processing tools.
- Optimized backend performance and improved user experience through AI-powered automation.

Fitness Tracker Backend | *Java, Spring Boot, Spring Security, PostgreSQL, Neon DB, Docker, Swagger* May 2026

- Developed a secure backend for a fitness tracking application using Spring Boot.
- Implemented secure authentication and authorization with Spring Security and DTO architecture.
- Created APIs for workout and user management features.
- Deployed the monolithic backend on Render with Docker support.

AI Resume Reviewer (RAG) | *TypeScript, Node.js, Google Gemini, LangChain, Pinecone* June 2026

- Built an AI-powered Resume Reviewer using Retrieval-Augmented Generation (RAG) for context-aware resume analysis.
- Integrated LangChain embeddings with Pinecone Vector Database for semantic search and relevant context retrieval.
- Leveraged Google Gemini to generate ATS optimization, skill analysis, and personalized resume improvement suggestions.
- Generated role-specific interview questions and actionable feedback to help candidates improve their resumes.

Experience

MERN Stack Developer Intern At Depple Dec 2025 – Feb 2026

Remote Internship

- Developed scalable full-stack web applications using MERN technologies.
- Designed and implemented RESTful APIs using Node.js and Express.js.
- Managed MongoDB databases and optimized CRUD operations.
- Built responsive React.js interfaces to enhance user experience.

Technical Skills

- **Programming Languages:** C, Java, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Vite, Tailwind CSS, Framer Motion, Shadcn UI, Clerk
- **Backend:** Node.js, Express.js, Nest.js, Spring Boot, Spring Security, REST APIs, Swagger
- **Databases:** MongoDB, PostgreSQL, Redis, Neon DB, Vector DB
- **Cloud & DevOps:** AWS (Basic), Docker, RabbitMQ, GitHub Actions, CI/CD, Vercel, Render
- **Tools & AI:** Git, GitHub, LangChain, RAG, LLM Integration, Claude

Achievements & Certifications

- Solved 100+ coding challenges across online programming platforms, strengthening problem-solving skills.
- Earned a Generative AI certification from Coder Army, covering LLMs and prompt engineering.
- Completed a Git & GitHub certification with practical experience in version control workflows.
