## About Me

A developer focused on backend development, experienced in building and deploying web applications with working knowledge of frontend. I enjoy building practical solutions and working across the stack when needed.

## Education

BKNMU University

July 2023 – Mar 2026

Bachelor of Computer application

**CGPA: 8.02 / 10**

## Projects

**Microservices Task Management System** | *Docker, RabbitMQ, Express.js, Mongo DB*

Backend Project

- Built a scalable microservices-based backend system with independent services for user, task, and notification management.
- Implemented asynchronous communication using RabbitMQ for reliable inter-service messaging.
- Containerized all services using Docker and orchestrated them with Docker Compose for consistent local and cloud deployment.

**Research Assistant** | *Java, Spring Boot, WebFlux, Gemini API*

Mar 2026

- Built a research assistant extension to summarize and store notes using Gemini API.
- Implemented backend services with Spring Boot and WebFlux, using Lombok to simplify code.
- Managed note processing, API integration, and data handling for smooth performance.

**Quick-AI** | *MERN Stack (PostgreSQL)*

Aug 2025

- Built an AI-powered content creation platform that enables users to generate articles, images, summaries, and resumes with ease.
- Integrated AI APIs to automate content generation and streamline digital workflows across multiple use cases.
- Designed and developed features like image/background removal, blog tools, document processing, optimizing for performance

## Experience

**MERN Stack Developer Intern At Depple**

Dec 2025 – Jan 2026

Remote | Internship

- Worked as a MERN stack developer, building full-stack web applications.
- Developed RESTful APIs using Node.js and Express.js
- Designed and managed database operations using MongoDB for CRUD functionalities.
- Built responsive user interfaces using React.js.

**Fullstack Development Academic Project**

Nov 2025 – Feb 2026

Edemy LMS – Learning Management System

- Built a Learning Management System with course enrollment, video access, and progress tracking.
- Integrated authentication using Clerk and handled API integration for core functionalities.
- Worked on application logic and ensured smooth data flow across features.

## Technical Skills

- **Frontend:** React.js, Vite, TailwindCSS, Framer-Motion, Shadcn UI.
- **Backend:** Node.js, Express, Springboot, Spring-Security, Spring JPA, MongoDB, PostgreSQL, Neon DB, Clerk.
- **Languages:** C, Java, JavaScript, TypeScript, SQL.
- **Tools:** Git, GitHub, Docker, RabbitMQ, Vercel, Render, Postman.

## Achievements & Certifications

- Completed a certified Data Structures & Algorithms course, strengthening problem-solving and core concepts from pluto acedamy.
- Worked on building core features, handled major parts of the project, and took part in key development decisions for the final-year project.
- Completed a Git & GitHub course by (EmbarkX), gaining practical knowledge of version control and collaboration workflows.
